

Featuring our patented **“finger-protected”** system which helps prevent pinched fingers between section joints. Section joints have a dual seal system to ensure a tight fit and reduce airflow. This is one of the many standard safety features of this product.

## Enjoy these Advantages

### Weather the Ontario Climate.

Built to withstand year round weather conditions, our doors have a continuous polyurethane insulated core, arctic-grade bottom seal, dual-seal section joints and double-fin perimeter weather-strip to help reduce air flow and lower your energy costs.

### Built to last.

Door sections are constructed from high-strength, rust-resistant galvanized steel coated with a baked-on polyester paint finish, ensuring a durable and long-lasting door.

### Green comes standard.

Our "Neufoam" polyurethane insulation is zero ozone-depleting to help reduce greenhouse gas emissions. Woodgrain embossing simulates real hardwood without depleting our forests. Neufoam is the densest polyurethane in the garage door industry

## Panel Styles
