

Strip Curtains

Designed for any size door opening and the most economical way to close a door opening. The clear flexible strips provide unsurpassed visibility for safety in high traffic areas. The edges of the strips are rounded to avoid the danger of being cut, concave-convex overlapping pattern enhances the sealing effect.

Product Details:

Strip curtain enclosures reduce heat and refrigeration costs, minimizes energy consumption, provides noise control, and increases employee comfort. They provide excellent visibility for oncoming traffic and thus increasing personnel safety.

Strip curtains help increase productivity by increasing personnel safety and thus help decrease energy and production costs.
