

Freezer Doors

Doors are custom manufactured to meet your particular requirement. Special purpose doors available in a variety of shape or sizes.

Product Details:

- Cold storage and freezer applications
- Variable Speed Doors suited for high-speed material handling & large vehicle applications
- Flex Panel Doors suited for high impactability applications

Speed

To open a 10 foot wide double slide door in 2 seconds!

Power

For the wider and higher doors now required to service your state-of-the-art materials handling equipment.

Performance

To open large doors at high speed with minimal stress on the door and operator.

Safety

Features to protect both the door and the operating personnel.

Economy

One door opening, one door assembly to buy, install and maintain.

Energy Savings

Through reduced cycle times, 2, 3, 4 or 6" Urethane foamed in place insulation, positive gaskets to eliminate air infiltration and heater cables on freezer doors to prevent frost.

Reliability

The quality of materials and electrical components EUREKA® builds into every door provides years of trouble free performance.

Features:

- 20 gauge galvanized, 22 gauge white pre-painted steel or 20 gauge stainless steel cladding.
- Solid fir door framing.
- Urethane foamed in place insulation at 2.5lbs/ft. in 2, 3, 4" cooler and 4 and 6" freezer.
- Full height non-electric reversing safety edge.
- On freezer doors, perimeter heater cables are fuse protected and thermostatically controlled.
- Water resistant electrical throughout, exceeds Nema 12.
- Nylon reinforced neoprene gaskets.
- 1 ½ Hp electric operator with numerous features and additional options.
