

Model H - Industrial-Duty Hoist Operator

The Model H continuous-duty door operator is designed for use on rolling doors and grilles and industrial sectional doors with standard, high or full vertical lift applications.

Standard Features:

- Logic 3.0 Control Board (L3)
- Available $\frac{1}{2}$ HP, $\frac{3}{4}$ HP and 1 HP units, must be hard-wired
- Available in various voltages 115, 208, 230, 575; single phase and 3 phase
- Floor level chain hoist with electrical interlock for emergency manual door operation
- High starting torque continuous-duty motor with overload protection
- Heavy-duty 5L V-belt
- 3-button o/c/s station
- Industrial ball bearings on output shaft
- PosiLock® Mechanical Brake System
- Prewired to accept sensing devices (see Sensing Devices)
- External radio control terminals
- Fully adjustable linear-driven limit mechanism
- Motor removable without affecting limit settings
- Adjustable friction clutch
- Efficient V-belt primary drive, chain/sprocket secondary
- #50 drive chain
- Baked-on high-durability black powdercoat finish
- Door speed approximately 8 to 9 inches per second
- Approximate shipping weight - 110 lbs.
- Remote transmitters optional
- Various safety features available as options
