

Model HCT - Heavy-Duty High Cycle Trolley Commercial Door Operator

The Model HCT is designed for installation in even the tightest applications, such as apartment houses, condominiums and low-clearance installations. At only 8" high, it's up to 10" shorter than other overhead operators.

Standard Features:

- Rugged worm drive powered by a heavy-duty 1/2 HP motor rated for continuous duty
- Gear drive system lubricated in an oil bath for unmatched durability in high cycle applications
- Rubber isolators on the chassis and front idler for quiet operation
- Super-quiet trolley assembly that glides on 6 UHMW rollers
- Advanced Control Board features LED indicators
- Electronic Reversing Device
- Built-in 312HM Security+® receiver to easily add remotes
- Keyed trolley disconnect with auto reconnect for added security
- Heavy-duty 12-gauge steel track available for doors 8', 10' and 12' high
- Ships fully assembled for ease of installation
- Remote transmitters optional
- Various safety features available as options
