NORTHLAND GARAGE DOORS

Your garage door is an integrated system that works to protect your home from the harsh Canadian elements.

Since your home is the single largest investment you will make, it's important to have our experts install your garage door safely and correctly. Here are just some of the reasons you should consider a Northland garage door:

Improved curb appeal

Why look like everyone else on the block? Choose from a wide variety of styles and design options to give your home the distinctive, elegant look it deserves.

Return on investment

Garage doors were #2 for return on investment (ROI) on a list of 35 popular home remodeling projects. Installing a new garage door is one of the least expensive ways to affect a potential buyer's first impression and, consequently, the resale value of your home.

Energy efficiency

Built to withstand many different weather conditions, our doors have a continuous polyurethane insulated core, arctic-grade bottom seal and dual-seal section joints to help reduce airflow and lower your energy costs.

Northland Aluminum Fullview

An inspiration in both form and function, Northland StyleView offers architectural flexibility, maximum visibility and extreme durability in maintenance-free aluminum doors.

The Custom Profile, Wide Profile and Narrow Profile models feature a series of unprecedented designs, architectural glass options and 188 ArmorBrite™ or 3 anodized colour finishes to showcase a home's unique flair. From modern styles to classic facades, StyleView is the choice for achieving a contemporary look or accentuating the design of any residence.

Pages 4 - 5

Northland R-Series Polyurethane-Insulated Doors

Northland's polyurethane is the densest in the garage door industry, providing superb thermal efficiency.

Door sections are constructed from high-strength, rust-resistant galvanized steel coated with a baked-on polyester paint finish, ensuring a durable and long-lasting door.

Built to withstand year-round weather conditions, our doors have a continuous polyurethane insulated core, arctic-grade bottom seal, dual-seal section joints, and double-fin perimeter weatherstrip to help reduce airflow and lower your energy costs.

Pages 6 - 19

Northland Commercial Doors

Northland's commercial overhead doors feature our continuous polyurethane technology. This technology prevents air pockets inside the panel and ensures superior adhesion of our cfc/hcfc-free insulation to the steel skin.

Northland doors have a higher strength-to-weight ratio, offer a better thermal barrier (higher r-value), and resists deflection. Our doors are engineered to provide many years of worry-free operation and are suitable for a wide range of applications.

Our polyurethane doors are available in a variety of panel thicknesses, colours and section joints.

Pages 20 - 25

Styleview | Aluminum Sectional Door

Custom Profile

An ideal complement to modern, conventional and rustic styles, the Custom Profile model is a 2" thick rail and stile door with a standard joint seal. Engineered for resilience and exceptional beauty, the Custom Profile model offers a maintenance-free alternative to steel and wood carriage house doors.

Wide Profile

If you are looking for a heavy-duty door that will enhance your home's unique style or timeless architecture, the Wide Profile model is the answer. Designed for both strength and durability, the 2" thick Wide Profile door features rail and stile construction with a standard joint seal.

Narrow Profile

Accented with a streamlined design, the Narrow Profile model is a 1-3/4" thick door with a ship lap section joint and standard joint seal. This model is a maintenance-free solution for your garage door needs. In addition, Narrow Profile doors feature architectural variation with multiple glass options for contemporary and traditional styles alike.

Polyurethane
Insulated
Steel Door

ST175

1.75" Commercial
Polyurethane
Insulated
Steel Door

Overview

- Polyurethane insulation is zero-ozone depleting and provides higher thermal properties which result in significant energy savings.
- Cavity-free, uniform insulation ensures excellent adhesion to the sheet metal resulting in an exceptional strength to weight ratio that qualifies for a wide range of applications.
- Sections are evenly filled using a continuous process with CFC/HCFC-free polyurethane insulation.
- Insulated sections fabricated from pre-painted, hot dipped galvanized steel sheets with rigid polyurethane insulation core, face sheet stucco embossed and rib reinforced.
- Sections feature thermal break, steel-polyurethane-steel sandwich formed in a computer-controlled continuous process

Polycarbonate

1.75" Overhead Sectional Polycarbonate Door

Overview

- Panels made with 5/8" (16mm) thick, triple-walled polycarbonate sheet are lightweight, providing easy operation with minimum stress on hardware components.
- Translucent polycarbonate panels provide a naturally-lit, inviting work environment and help reduce winter heating costs through the effects of solar heat gain.
- Polytite doors are extremely impact-resistant and can withstand long-term exposure to extreme elements such as sun, wind, rain and snow without cracking or splitting.
- Particularly suited for service garages but ideal for all types of industrial, agricultural, commercial, institutional and residential overhead door installations where an attractive, light-transmitting, strong, lightweight door is desired.
- P175T comes standard with insulated Thermatite panel section fabricated from pre-painted, hot dipped galvanized steel sheets with rigid polyurethane insulation core, face sheet stucco embossed and rib reinforced.

SECTION THICKNESS

1 3/4" (45mm)

POLYCARBONATE PANELING

The external side of the Polycarbonate is protected with a coextruded layer warranting resistance to atmospheric agents and U.V. rays.

Thickness: 5/8" (16mm)
Structure: Triple-walled
Weight: 0.553lbs/sq ft (2.69 kg/sq m)
R-Factor: 2.500 ft² hF/Btu
U-Factor: 2.271 W/m²K

Fire Reaction: ASTM E84-01 Flame spread and smoke Developed: Class A.

Solar Heat Gain Coefficient: Clear: 75%
Light Transmission: Clear: 74%

STILES AND RAILS

Fabricated from 6063-T6 aluminum alloy extrusions, extrusion thickness 0.063" (1.6mm) thick, and 0.090" (2.18mm) thick at hardware mounting locations.

End Stiles: 2 1/2" (64mm) wide aluminum;
 Double end stiles for doors 16'-3" (4953 mm) wide & over.

Centre Stiles: 3" (76mm) wide aluminum
Pair of Meeting Rails: 4 1/2" (114mm) high aluminum
Top Rail: 2 3/16" (56mm) high aluminum
Bottom Rail: 2 9/16" (65mm) high aluminum

REINFORCEMENT AS REQUIRED BY WINDLOAD

Where required, full width integral horizontal, reinforcement truss at meeting rails as required. Galvanized steel truss as required.

POLYURETHANE BOTTOM SECTION

Insulated sections fabricated from pre-painted, hot dipped galvanized, steel sheet; with rigid polyurethane insulation core, CFC and HCFC free, face sheet stucco embossed and rib reinforced.

For structural integrity, all doors 20'-0" and wider, the Thermatite bottom section is standard.

Doors less than 20'-0" wide the Thermatite bottom section is optional.

P175T **R** 16 ft² hF/Btu (calculated)

MAXIMUM OPENING WIDTH* 24' 2" (7366)*

MAXIMUM OPENING HEIGHT* 18' (5512 mm)*

COLOURS

(Orange Peel is available in Clear and Bronze)

Stock Stiles and Rail Colours:

A variety of stile and rail colours are available with an Optional Powder Coat Systems. See factory and/or dealer for details.

*For larger sizes, please consult factory. **Upcharge for colour applies to these options.

Warranty

10 years against breakage, excessive yellowing and loss of light transmission on the panels

1 year on materials and workmanship
